Would the Earth survive without the moon?

People falling asleep behind the wheel may cause accidental crashes.

Travellers used almanacs to chart the phases of the moon and plan their journeys.

Norwegians like playing outside in the snow, even if it is under artificial light.

People automatically assume that I find the polar nights difficult, but actually I love them.

The axis on Mars can tilt so much that the ice at its poles slides down to the equator.

A 'polar night' is where the sun basically doesn't appear for twenty-four hours.

My sister is a light sleeper, but I sleep like a log.

When I checked, the children were wide awake.

Will the myths about the moon ever cease to exist?

Spring is a cheerful season.

Pakistan is considerably warmer than Norway.

The contrast between winter and summer nights in Norway is huge.

You might think that everyone would stay indoors, nice and cosy, but they don't.

The council might like to reconsider their plans for a new food quarter in our street.

The council's plans received a lot of criticism.

It wasn't a deliberate mistake.

Northern Norway has two depressing months of no daylight in winter.

The seasons in Norway are very dramatic.

I put in earplugs on planes so I can sleep.

There's a lot of evil in the world.

The 1969 moon landings were faked.

Nearly half of US adults fall asleep unintentionally during the day.

The woman was fast asleep on the train and missed her stop.

The film of the 1969 moon landings cannot be genuine.

My children always get up at the crack of dawn.

The second winter in Norway is when the light gradually starts to come back.

Sleeping in a hammock can be quite uncomfortable.

You can catch up on sleep by having a lie-in.
